Project update

As we approach the end of the year, the Bookham Wind Farm team at Squadron Energy would like to extend our thanks for your continued interest and involvement in the project.

We wish you a safe and happy festive season and look forward to continuing our collaboration in the year ahead.

Our office will be closed from 5.00pm 24 December 2025 and will reopen 9.00am 5 January 2026.

Next steps

The assessments that will inform the Environmental Impact Statement (EIS) and wind farm layout have been progressing well and remain a key focus for the project over the next 2 to 3 months. The information from these studies, together with community feedback, will influence the wind farm design and ensure that the project meets environmental and planning requirements.

We continue to visit the area regularly and are available to meet anyone interested in the project. Please contact the project team via bookhamwind@squadronenergy.com to have your say.

Looking ahead

We have been liaising with our hosts, neighbours, Council and the local RFS on involving interested community members in the development of our fire management plan. This is planned for 2026 and more details will be confirmed and shared soon.

Company update

It has been a busy year for Squadron Energy. You can see what we have achieved in our [2025 Year in Review](#).

After three years of dedicated commitment to engaging with the Bookham community, Tom Cox will be transferring to our Operational team. We thank him for his contribution.

As Tom moves into his new role, we are delighted to introduce Mark Cameron. Mark brings strong project experience and will ensure continuity through this transition.

We would also like to share that Luke Calo is changing roles and will remain involved in the project as a civil engineer on the team. To support this transition, we welcome back Dan McCallum. Dan has previously worked on the project and his familiarity and experience will be a great asset.

To stay informed with the latest updates on the Bookham Wind Farm project, visit [our website](#) and enter your details in the newsletter subscription section.
