Expected capacity

**260k**

Expected homes powered

**350k**

Expected tonnes of emissions avoided

**62**

Wind turbines

**150MW**

Battery energy storage

## Project update

As 2025 draws to a close, we are delighted to share the final Moreton Hill Wind Farm newsletter for this year. Reflecting on the past 12 months, it's been a year of significant progress and collaboration. Our team has been pleased to work alongside our host landowners, neighbours, and community members, as well as local, First Nations, State and Federal representatives, to advance the development of the proposed Moreton Hill Wind Farm project.

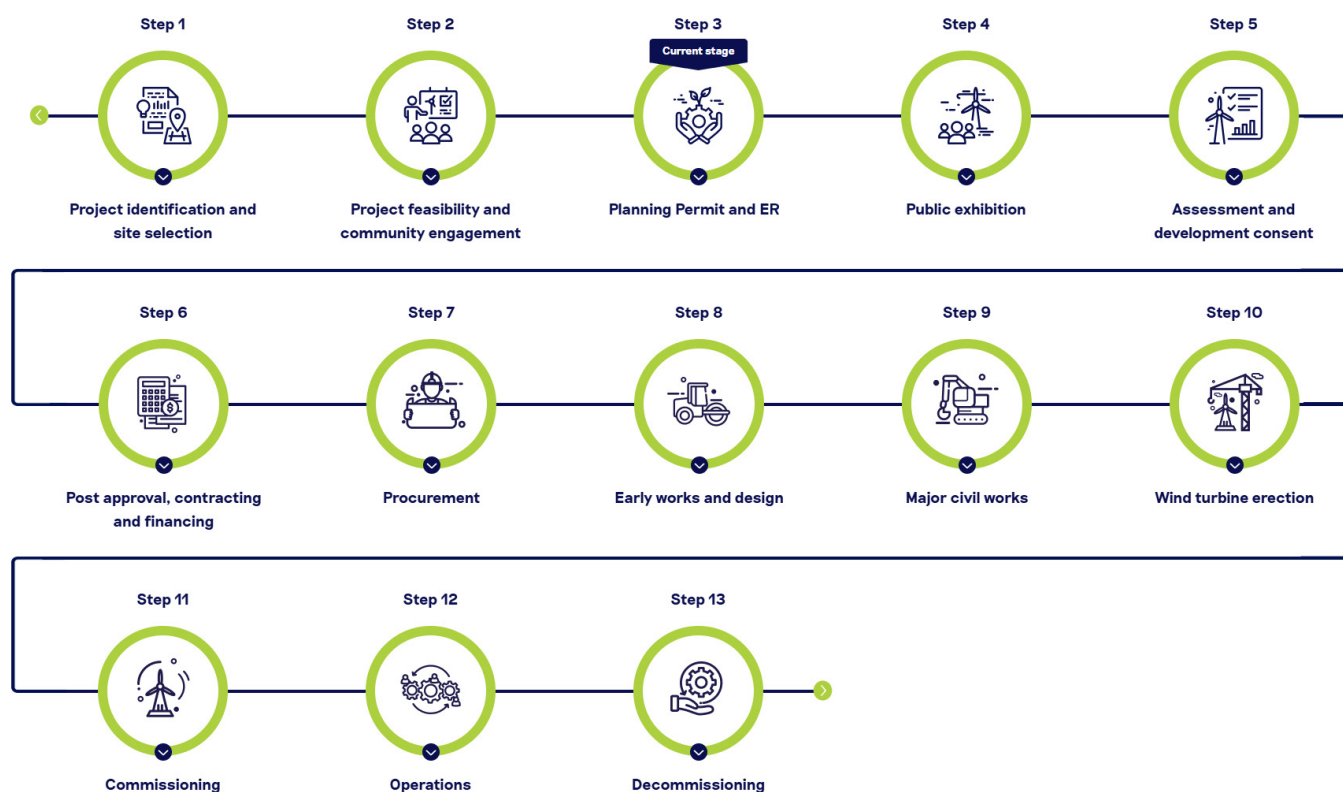

We have continued to invest in our local communities through sponsorships and partnerships, supporting clubs, schools and organisations that make the district special. We have also launched new initiatives, such as the Community Investment Fund, to be implemented from construction and to ensure that our work leaves a lasting, positive legacy.

Our project team would like to wish you and your loved ones a very merry Christmas and a safe, happy New Year. We look forward to continuing our work together in 2026, building on the strong foundations we have established and embracing new opportunities to collaborate, innovate and deliver for the community.

## Project schedule – what’s next?

Moreton Hill Wind Farm is currently in the planning approval phase and we are working towards submitting the Planning Permit and Environment Report in early 2026. Once submitted, we will notify all stakeholders and invite everyone to review and provide feedback during the public exhibition period.

We appreciate your ongoing interest and support as we move through these key milestones.

## Community investment survey

To understand what initiatives are important, we are encouraging community members to share their thoughts on future local community priorities by completing the Squadron Energy Community Investment Survey.

The survey is a part of Squadron Energy’s community investment commitment, which is focused on leaving a legacy for local communities by contributing to local programs and initiatives.

Scan the QR code to have your say and shape future community programs.

## First Nations engagement

Squadron Energy recently met with the Wadawurrung Traditional Owners Aboriginal Corporation (WTOAC), bringing together WTOAC executives and project team members for a meaningful on-Country engagement.

The teams engaged in open and respectful dialogue that deepened understanding of Wadawurrung cultural heritage, connection to Country, and how the project could deliver lasting benefits for Wadawurrung people. Squadron was also warmly welcomed with a traditional smoking ceremony.

*Squadron Energy and WTOAC Executives on Country*

As part of the visit, representatives from WTOAC joined Squadron Energy at the proposed Moreton Hill Wind Farm site. The site walk provided a valuable opportunity to share stories and listen to perspectives, while reinforcing the importance of ongoing collaboration.

Squadron Energy is committed to respectful and genuine engagement with Traditional Owners and looks forward to continuing to strengthen the relationship with WTOAC as the project progresses.

## Community sponsorship

In 2025, Moreton Hill Wind Farm was proud to support a range of local groups and initiatives, including:

- Skipton Football Netball Club – contribution to a new scoreboard
- Skipton Primary School – contribution towards a Gaga Pit
- Friends of the RSL Skipton Branch - support to upgrade the Veterans walk
- Linton cricket club – contribution towards playing shirts (pictured)
- Skipton Progress Association – Spring Festival

Our sponsorship program is open all year round and we welcome applications from:

- Community organisations, events or initiatives based near the project (e.g. Skipton and Linton)
- Projects that benefit the wider community (e.g. Landcare, Country Fire Authority)
- Initiatives that support First Nations communities

Scan the QR code to view the sponsorship guidelines and application form.

## Skipton Spring Festival

In November, Squadron Energy was proud to sponsor the third annual Skipton Spring Festival at the Skipton Golf and Bowls Club. The event was a fantastic celebration of local produce, craft talent, rural heritage, and country hospitality. Our project team enjoyed connecting with community members, answering questions about Moreton Hill Wind Farm and sharing project updates throughout the day.

## Looking ahead

As we move into 2026, planning and consultation will continue. We remain open to feedback and are dedicated to working collaboratively with the community and stakeholders to shape the future of Moreton Hill Wind Farm.

Members of our project team are regularly in the region and are happy to meet with the community regarding the project. If you would like to meet with us, please reach out using the contact details below.

Our office will close from 5.00pm 24 December 2025 and re-open 9.00am 5 January 2026.
