## Project update

Clarke Creek Wind Farm - Stage One has been ranked in the top 10 wind generation assets by capacity factor in Australia since February, with Rystad Energy also naming Squadron Energy as February's leading wind generator. Thanks to the addition of Clarke Creek Wind Farm, we were able to generate 387GWh that month.

We'd like to thank the ongoing support of landholders, neighbours, local businesses, wider community and everyone who has played a part in reaching this milestone.

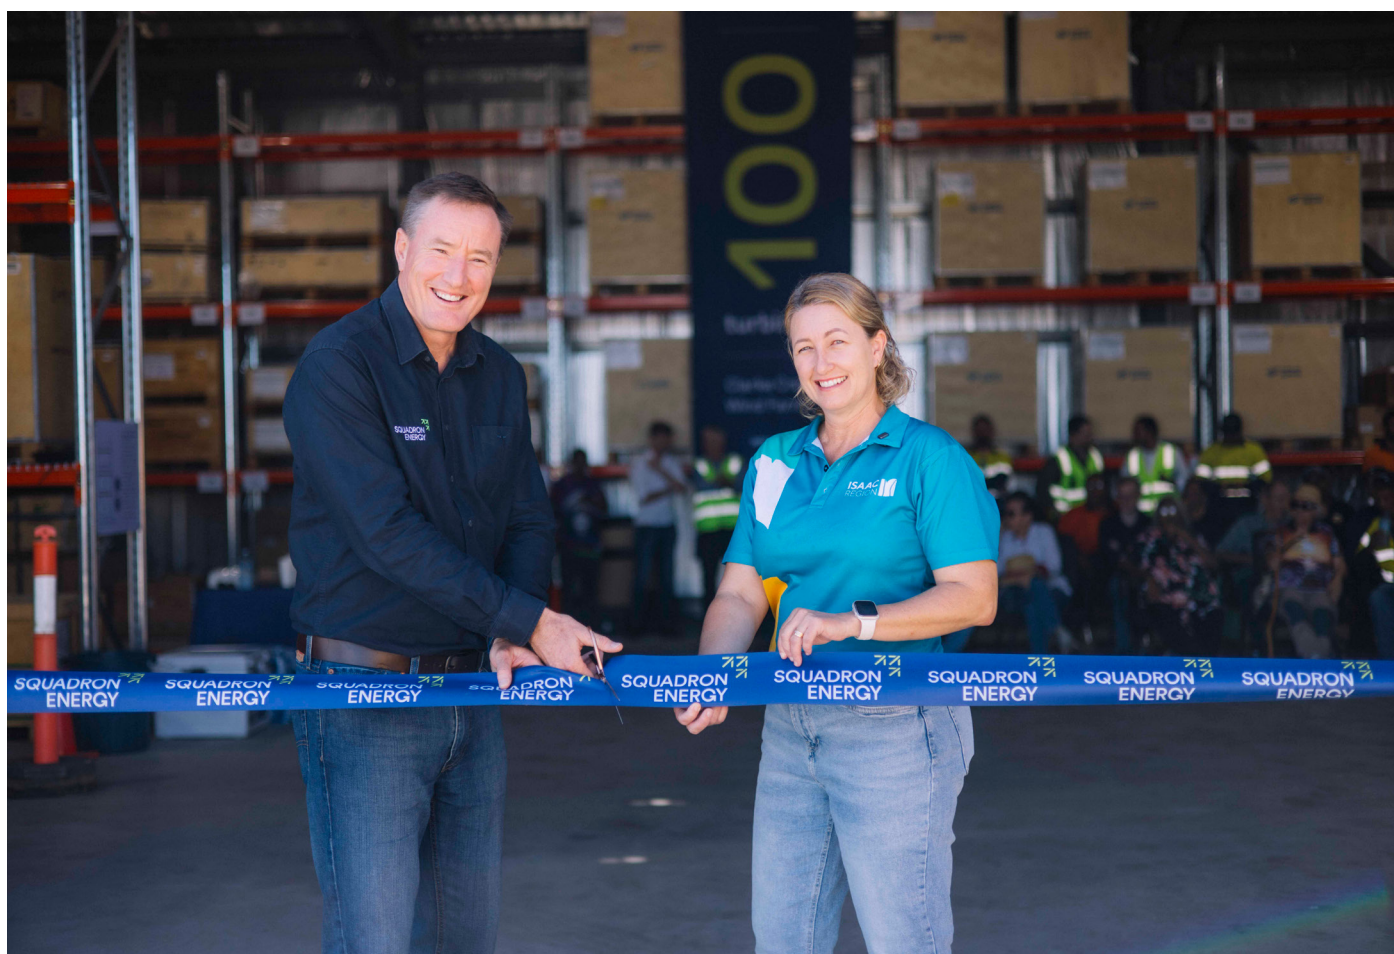

## Operations and Maintenance Building opening

We officially opened the Clarke Creek Wind Farm Operations & Maintenance (O&M) Building in March. The facility serves as the base for the onsite team responsible for the ongoing operation and maintenance of the wind farm.

The opening provided an opportunity to recognise the efforts of those involved in delivering the project and to mark the shift into the operational phase, with a permanent local presence supporting the wind farm into the future.

We were delighted to welcome members of the Barada Kabalbara Yetimarala Traditional Owners, who provided a warm Welcome to Country and Smoking Ceremony. Guests also had the opportunity to learn about local culture through a traditional dance, making for a memorable and meaningful occasion that acknowledged the deep cultural connection to the land.

Squadron Energy CEO Rob Wheals with Isaac Councillor Viv Coleman

## Community Benefit Fund

The Clarke Creek Wind Farm Community Consultative Committee (CCC) recently met to assess applications to the CCWF Community Benefit Fund, with seven local projects and events approved for funding.

More than \$163,000 has been awarded, supporting a range of initiatives across communities near the wind farm, including upgrades to local community facilities. These grants reflect Squadron Energy's commitment to investing in projects that strengthen community connections and deliver practical, lasting benefits for the region.

## Health and safety

Community members may recall earlier work to remove asbestos-containing brake pads from a number of wind turbines. All required actions have now been completed in accordance with relevant regulations and safety requirements.

There is no ongoing issue, and the site continues to run in line with applicable health and safety standards.

## Power Promise Program

Squadron Energy's Power Promise Program is a community investment initiative that helps deliver energy-related benefits to leave a lasting legacy for communities near our renewable energy projects.

The Clarke Creek Bill Bonus pilot is for residents and businesses within 20km of Clarke Creek Wind Farm – Stage One. Eligible applicants will receive a \$1,000 annual credit on their electricity bills, delivered directly via our partner Reswitch.

We encourage community members to sign up or share the program details with family, friends or neighbours who may be eligible.

To receive a credit for the past financial year, eligible participants must register before 30 June. [Check your eligibility](#) via Reswitch.

For more information head to our [Bill Bonus web page](#).
