Project update

Clarke Creek Wind Farm recently reached a significant milestone, investing more than **\$1 million in the community**. Since 2022, \$1.29 million has been shared with more than 70 organisations and initiatives, while 30 local students have been granted scholarships worth nearly \$200,000.

This milestone has been driven by a broad range of sponsorships, grants and scholarships across the region.

Local groups supported include Clarke Creek Pony Club, Marlborough District Camp Draft, Valkyrie State School and many others.

Squadron Energy is committed to making positive impacts in the region. If you're part of a local non-profit that supports the community and needs funding, please apply for sponsorship through the [Squadron Energy website](#).

Supporting our community

In recent months we've had the privilege of being involved with Clarke Creek Pony Club hosting the Lexus Melbourne Cup, the charity fundraiser Isaac Mayor's Charity Ball and the Clarke Creek Camp Draft. This much-loved community event brought the community together to celebrate the skills of riders of all ages.

Clarke Creek Wind Farm Bill Bonus

We're proud to partner with Reswitch to launch the first initiative under the [Power Promise Program](#): a two-year bill bonus pilot at Stage 1 of Clarke Creek Wind Farm.

Homes and businesses located within 20km of [Stage 1 of Clarke Creek Wind Farm](#) may be eligible to receive a \$1,000 yearly electricity bill credit under the pilot.

Visit the [Reswitch website](#) to see if you're eligible.

Scholarship Fund opens 7 September

Applications for the next round of community fund scholarships will open on **Monday 7 September 2026** and close on **31 October 2026**. The grants support local students to pursue their academic and career goals and deliver positive outcomes for the Clarke Creek region. This initiative reflects our ongoing commitment to creating lasting benefits for the communities around Clarke Creek Wind Farm.

More details, including eligibility criteria and application guidelines can be found on our website. To apply, visit [Smarty Grants](#).

The Community Consultative Committee (CCC) will meet in November to review scholarship applications, with successful applicants expected to be announced by the end of the year.

Collaborating to maximise positive impact

An industry coalition, including Squadron Energy, was been named a [finalist in the Collaboration Award](#) in the recently announced 2026 Clean Energy Council Awards.

The partnership between Squadron Energy, Iberdrola Australia, Isaac Regional Council, CS Energy, Tilt Renewables and ACCIONA Energía was chosen for maximising the positive impact of renewable projects for local communities by coordinating community benefit activities.

Working together over the past year, the partnership:

- coordinated investment in regional infrastructure, including a \$750,000 upgrade to the Broadsound telecommunications tower and works on Marlborough-Sarina Road
- ran a Renewable Energy Supply Chain Forum
- supported skills training and long-term workforce development.

Squadron Energy Head of Community and Regional Development Jessica Kite said the recognition reflected what communities gain when developers plan community investment together, rather than project by project.

“Putting communities first is core to how we do business at Squadron, and being a finalist in this award shows the approach delivers real local benefits,” Ms Kite said.

“When developers coordinate, consultation is more targeted and community investment goes further to make a real and lasting difference on the ground.”
